Recommender Engine

Board Games Expansion

Designer, Artist, Publisher and Author:
Marcos V Panyagua Fernandes

Data Source:

Almost 16 million entries:

Data from www.boardgamegeek.com

- Information on 19 thousand different games
- Reviews of 89 thousand different users

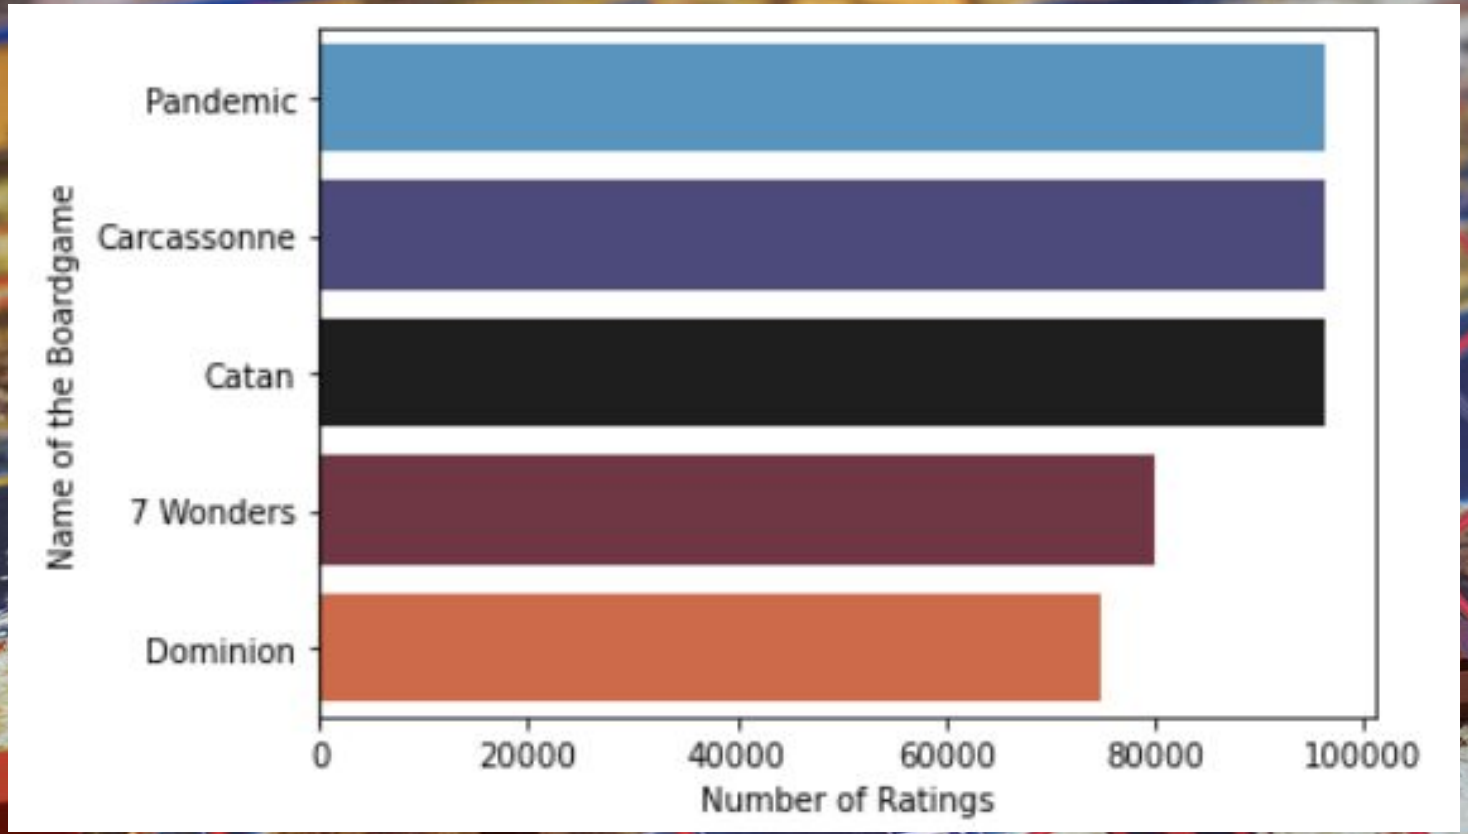
What is a rec sys?

Stakeholder:

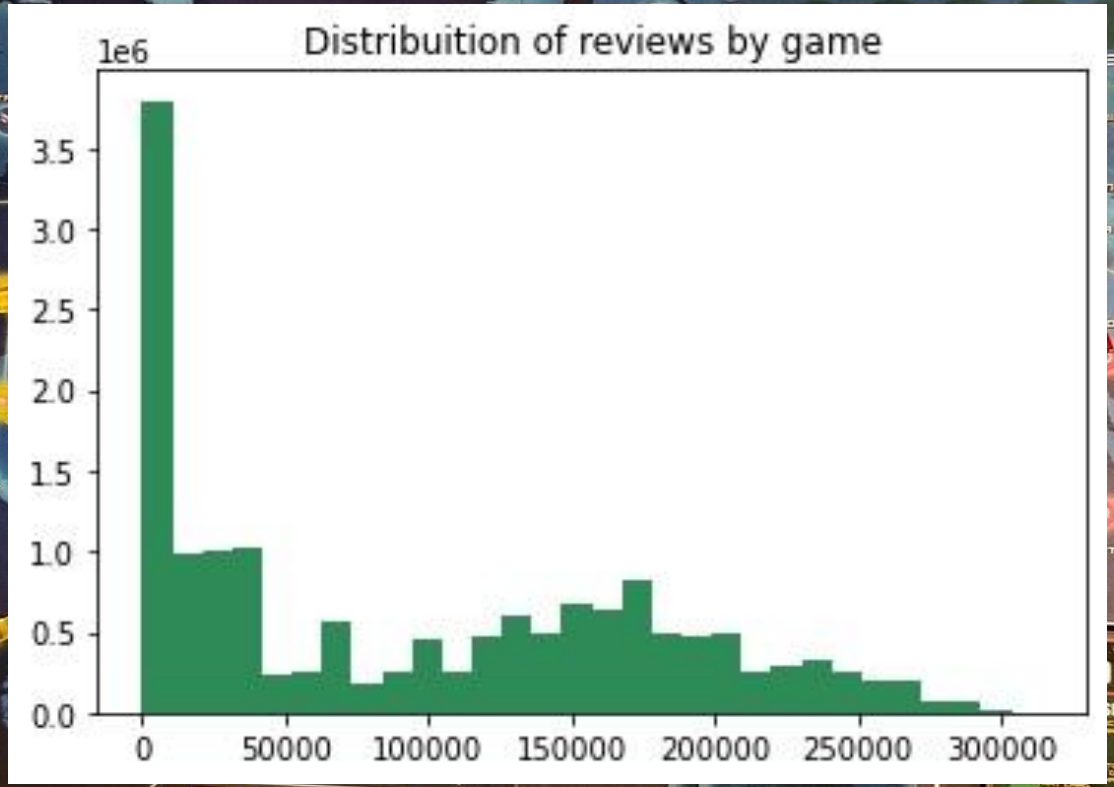
Small Retailers

- How can they benefit from a recommendation system?

Analysis of the Data:



Analysis of the Data:



Modeling with Singular Value Decomposition (SVD) :

- Improvement on the model of about 20% RMSE
- Hyperparameter tunning - GridSearch
- More understandable than memory-based

RMSE: 1.5582
1.5581676173341248

RMSE: 1.3117
1.3116574399175387

Recommendation working:

```
recommendation_nickname('jollyfulpanda')
```

```
These are your recommendations of games you might like:

['Raptor',
 'Santorini',
 'No Thanks!',
 'One Night Ultimate Werewolf',
 "Ca$h 'n Guns (Second Edition)"]
```

```
get_recommendations('jollyfulpanda')
```

```
These are your recommendations of games based on the designer(s) you seem to like:

['504',
 'Fast Forward: FORTUNE',
 'Fast Sloths',
 'Formidable Foes',
 'Fast Forward: FEAR']
```
